

Guidelines for Project Final Report

Please consider the following guidelines for your final project documentation:

- **Title Page** (members name, class number and name, submission date)
- **Table of Contents**
- **Introduction** (brief description about your project)
- **Project Specifications:** Explain what your system/product can do.
- **Design:** Draw block diagrams for your project and explain how they work. List the software modules you have built in the project.
- **Algorithms:** (If possible) describe the algorithm of your project
- **User manual:** Screen shots from your product and how they work
- **Summary and Conclusion:** Summarize and conclude the project
- **Future Work:** Discuss future work, e.g., how this work can be extended or improved in the future (e.g., improve the accuracy, add new functionality)
- **References**
- **Code listing:** Source code of your project
